How has the ELF affected your life?

I love my ELF, it has helped me to get off of my crutches.

How did that happen?

My doctor noted in my medical chart that I would probably not be able to walk again without the aid of crutches. 1.5 months into actually having decent weather and being able to ride my ELF consistently, I was able to get rid of the crutches. This week, I actually was able to go out to dinner with a friend and I did not take my cane.

// Some days
I do over 20
miles. //

Are you fully rehabilitated?

I'm still having trouble doing steps, however, I think as my leg muscles get stronger and I continue to ride my ELF that battle will also be won.

What happened?

I'm recovering from a tibial plateau fracture of left leg, as well as medial ligament injury in the right leg, and previous breaks in left leg.

How much do you drive your ELF?

I ride 4 to 5 days a week now, and average about 11 miles a day. Some days I do 7 miles and some days I do over 20 miles.
